Reconstruction Security Services | Stability Operations Expertise

Dedicated leader with experience providing reconstruction security services, identifying and mitigating military threats, managing complex operational procedures, and leading diverse military teams.

- **Proven experience providing top level security for multi-level industries and governments** and serving as team lead at the entrance control point validating persons, cargo, and vehicles using scanning systems, K9 bomb dogs, and physical searches.
- **Led tight security achieving zero security breaches in over seven months**; maintained weapons qualified with a 9mm, M4, AK47, AR15, and 240B; established new standard operating procedures for current or potential threats; and led tactical units in life threatening environments in support of Operation Enduring Freedom.
- **Select Awards**: Navy & Marine Achievement Medal, Combat Action, Sea Service Awards, and Good Conduct.

AREAS OF EXPERTISE:

Safety Regulations | High Threat Environments | Leadership & Mentoring | Quality Control | Employee Training & Development | Sensitive Intelligent Information | Risk Assessment | Project Management | Preventing Unauthorized Entry | Weapons Qualified | Microsoft Office | Lotus Notes | Blue Force Tracking Systems

PROFESSIONAL EXPERIENCE

GARDA FEDERAL / AEGIS, Jalalabad Air Field, Afghanistan
Personnel / VECP Supervisor

December 2016-February 2019

Directed security services by implementing validation procedures and security processes at the main control point for entrance into the U.S. military installation; executed searches and verified all persons entering by implementing K-9 searches, x-ray scanning, Closed Circuit Television (CCTV), and vehicle and personnel searches; supervised 18 security personnel; and managed over 70 personnel throughout various threatening conditions. Held an Active Security Clearance through the D.O.D., passed physical requirements for deployment, and completed Army Combat Casualty course.

Safety & Security Leadership:

- **Achieved zero security breaches in over seven months** after taking over as Team Lead and established new breach and mass casualty procedures for the entrance point.
- **Eliminated internal and external threats at military entrance points** by performing risk management scenarios, establishing force protection regulations, and managing security forces.
- **Enhanced security standards by leading** training on explosive detection, contraband confiscation, enemy operations, bomb making materials, and personnel and legal documentation validation.
- **Improved processes to ensure effective procedures and safety measures** by coordinating with the Department of State (D.O.S.), U.S. Department of Defense (D.O.D), Special Operation Forces (S.O.F.), United Nations (U.N.), North Atlantic Treaty Organization (N.A.T.O.), and Local Nationals (L.N.).
- **Established procedures to ensure security equipment** was maintained at full operational status that included hydraulic barrier ramps, cameras, entrance gate, vehicle and body x-ray scanners, remote crew weapon systems (CROWS), lighting systems, and individual armament.
- **Collected quantitative intelligence data** to promote the safety of the insulation.
- **Provided protection for sensitive personnel** by serving as an escort for important political figures, high-level diplomats, U.N. personnel, and N.A.T.O. personnel.

Operational & Weapons Management:

- **Established new standard operating procedures (SOP's)** that mitigated threats and met all contractual and force protection plan requirements in collaboration with the U.S. Army.
- **Weapons qualified and served as armorer** for 9mm, M4, 240B, AK47, AR15, and CROWS systems.
- **Executed a training series for weapons qualifications**, qualified over 100 foreign national individuals, conducted training and test fire for all weapons, and maintained accountability for over 300 weapons.
- **Led weapons training for U.S. Army medical unit** upon request.
- **Drove intelligence gathering efforts** by collecting/logging devices and paraphernalia into Counter Terrorism Unit and conducting initial interrogation on suspects.

GENERAL DYNAMICS, Fort Hood, TX

November 2007-December 2014

Quality Control Representative, Abrams Tank Program, 2009-2014

Oversaw quality control efforts that facilitated operations for five multi-level maintenance teams and led inspections for all Abram Tank Vehicles for the U.S. Army. Served as Team Lead managing liaison operations and equipment and personnel safety for off-site operations that included equipment maintenance and loading Abram Tanks from the transport ship. Achieved certification through a 240-hour Quality Control/Quality Assurance program.

Leadership Initiatives:

- **Earned a promotion granted by the Site Production Control Supervisor** after being peer selected out of 85 potential candidates.
- **Achieved a new contractual agreement** as a result of being the selected team member to mechanically inspect vehicles for the U.S. Army.
- **Selected to serve as site International Organization for Standardization (ISO) Representative**, contributing to a group that created the site ISO program that achieved a 100% audit pass rate.
- **Reduced errors in labor reporting and achieved document control** by independently planning and executing an internal audit of all site processes.

Select Achievements:

- **Achieved a 98% customer acceptance rate for three years** as a result of preparing military equipment for over 30 equipment fielding's.
- **Improved site operations** by creating new vehicle maintenance checklists, implementing classroom training, and ultimately reducing lag in product completion as part of the Lean Six Sigma Training group.
- **Received several Outstanding Performance Awards** from General Dynamics.

Test Evaluator, Expeditionary Fighting Vehicle Program, Aberdeen Proving Grounds, MD, 2007-2008

Oversaw testing and evaluation for proto type equipment operations including mechanical and computer functions and weapons systems. Reviewed technical manuals to ensure the correct maintenance procedures and collaborated with engineers to increase functionality and longevity. Held an Active Security Clearance through the D.O.D.

Select Achievements:

- **Increased operational functioning capabilities of Expeditionary Fighting Vehicle** by verifying the mechanical functions of new processes during the test and evaluation phase.
- **Achieved 100% environmental and safety inspection ratings** by ensuring compliance with all regulations.

UNITED STATES MARINE CORPS, Various Locations

June 2002-June 2006

Manager / Supervisor

Supervised diverse teams; oversaw route planning, combat logistics, and route reconnaissance; performed over watch security for voting procedures and check point security; provided security training for Iraqi army; and provided liaison support at army checkpoints. Led training in tactical vehicle movements, urban tactics, clearing techniques, and weapon systems. Performed house to house search and detain procedures and completed initial questioning of detainees. Held Active Security clearance through the D.O.D.

Leadership Initiatives & Achievements:

- **Led a transportation route clearing team** with high explosive charge kits to maintain area stability.
- **Provided instruction to 30 marines** in vehicular movements, maintenance procedures, urban tactics, security assessment techniques, marksmanship, resource management, and personal governing.
- **Managed a 15-person team who provided security** for 100+ military people and multi-million-dollar equipment.
- **Led 11 Marines as Assistant Squad Leader** in support of sustainability operations for regional growth.
- **Oversaw five teams of N.A.T.O. and U.S. units** handling district transportation security and distribution routes.
- **Selected as Section Leader for the 82nd Airborne Division Operations** responsible for tactical assets, security, safety, and operational readiness.
- **Achieved a perfect operational rate through three overseas deployments** by leading military vehicle operations in combat zones and conducting quality control inspections on military vehicles.
- **Removed several high-profile targets** by performing seek and capture missions.

EDUCATION

BS in Business Administration, Texas A&M University, Central Texas, 90 credits earned
